

**PLANS FOR PHASE II OF WYVIL ESTATE LANDSCAPING
BETWEEN MARTIN, NORMAN, OLIVER AND PETER HOUSES**

We will apply for grant funding to undertake this work but need you to be involved so that it is what everyone wants and so that we can all, between us, keep the whole estate looking attractive and feeling nice to live in.

The key design strategy has been to move the parking to the side street (in between the four blocks) to free space for green area between the four large towers. The relocation of the cars to the side street would also reduce noise and fumes to the nearby residents and increase the available space for pedestrians, footpaths and greenery. It would also be much more pleasing to the eye. The parking area would be isolated with denser hedges to reduce sound and pollution to all residents. Here is a plan view of the design:
